

TRACK-Dynamic

Automatic Butt Fusion equipment with traceability

Track-Dynamic is a range of Automatic Butt fusion equipments, electro-hydraulically operated, for the jointing of PE pipes and fittings along another plastic resins such as PP, PB, PVDF, in a range from 50 up to 500 mm.

Five models are available:

- Dynamic T160 - 50 to 160 mm
- Dynamic T250 - 75 to 250 mm
- Dynamic T315 - 90 to 315 mm
- Dynamic T400 - 160 to 400 mm
- Dynamic T500 - 250 to 500 mm

Fusions are automatically carried out using always the same electronic control box.

Fusion records stored contain full data traceability according ISO 12176-4

For more info see our Dynamic and Track datasheets
